on campus

A vegetarian diet is more than just eliminating meat, fish, or poultry. In fact, it **includes benefits** such as being naturally low in cholesterol and fats while also being high in fiber content. These factors help lower the risk of developing many chronic diseases, including heart disease, high blood pressure, some cancers, Type 2 diabetes, and obesity.

We appreciate that our students are focused on staying healthy and being socially conscious of their carbon footprints. That's why at Liberty Dining Services, we are excited to give you access to a wide array of vegetarian options across our retail locations and dining center.
